

PRESS RELEASE
MARZOCCHI PUMPS LAUNCHES FCIP AND FCIM, THE NEW RANGE OF GEAR PUMPS AND MOTORS MADE ENTIRELY OF CAST IRON

Thanks to the compact design and the capability to supply integrated valves, the new pumps and motors are particularly suitable for the Mobile sector, such as for example machinery and equipment for agriculture, construction, mining, logistics, cleaning and waste collection

Bologna, 20 October 2022 - Marzocchi Pompe S.p.A. (EGM:MARP), a leading company in the design, production and marketing of high-performance gear pumps and motors, **unveils a new family of Pumps and Motors**, called **FCIP** (Full Cast Iron Pump) and **FCIM** (Full Cast Iron Motor), **made entirely of cast iron.**

These new products target applications with higher pressures than those achievable with the GHP pumps and GHM motors already in the catalog, having a cast iron cover and flange but a distinctive aluminum body. Also, thanks to their compact design and the possibility of providing integrated valves, they are particularly suitable for The Mobile sector, i.e., machinery and equipment for agriculture, construction, mining, logistics, cleaning and waste collection. To cover as much as possible the market needs in terms of displacements, **both the new pumps and motors will have three subfamilies: FCIP2, FCIP3, FCIP4 and FCIM2, FCIM3, FCIM4.**

The official launch of the new line will take place **during the Bauma exhibition in Munich, Oct. 24-30**, and will then continue at EIMA in Bologna, Nov. 9-13.

Comment from CEO Gabriele Bonfiglioli: *“We have, as always, listened with great attention to our distributors and OEM customers, grasping the market need for these new products, which further expand our already wide range of traditional pumps. We believe that they will be able to seize many new opportunities, especially for applications in particularly harsh working conditions.*

We will not stop here: we keep on working to further expand the Elika family, which will reserve us a new entry in the coming year.”

The combined catalog of the new pump range is available for download at www.marzocchipompe.com.

Marzocchi Pompe S.p.A.

Marzocchi Pompe is a leading designer, manufacturer and marketer of high-performance gear pumps and motors, which find application in various fields: industrial, mobile and automotive. It ended 2021 with more than 40 million euros in sales revenue. Founded in 1949, it is controlled by the Marzocchi family, which holds the majority of the shares and is present in the company with Paolo Marzocchi, Chairman, and his son Carlo, Vice Chairman. The shareholding structure also includes CEO Gabriele Bonfiglioli and four other managers. Production is made entirely in Italy at the two sites in Casalecchio di Reno (BO) and Zola Predosa (BO). Marzocchi Pompe is present in more than 50 countries through an international distribution network.
