

PRESS RELEASE

**MARZOCCHI POMPE S.P.A. ATTENDING THE VTM AUTOMOTIVE SYMPOSIUM IN TURIN**

Bologna, 24 March 2022 – **Marzocchi Pompe S.p.A.** (EGM:MARP), a leading company in the design, production and marketing of high-performance gear pumps and motors, **will be attending the second edition of VTM - Vehicle Transportation Technology Innovation Meetings**, an international business convention dedicated to the technical and commercial community of the automotive, road and rail transport world, which will welcome buyers and decision makers from the world's leading OEMs, TIER 1 and SYSTEM INTEGRATORS, interested in interacting with companies in the area in a programme of pre-organised b2b meetings **to be held at OGR - Officine Grandi Riparazioni in Turin, on 30 and 31 March.**

This will provide an opportunity to present to automotive buyers for the first time live in Italy the latest innovations in the **automotive pump line**, as well as the ELIKA 1P and K1P families, launched on the market shortly before the start of the health emergency. These are all models that "look" to the world of cars of the future and to the electrification process, a trend that is now unstoppable at global level and also promoted by the RRP.

Gabriele Bonfiglioli, CEO of Marzocchi Pompe, commented: *"This event will give us the opportunity to illustrate the innovative and technologically advanced features of our automotive micropumps and the ELIKA family live to a large audience of industry professionals from all over Europe and North America. At the same time we will have the opportunity, with our Technical and R&D side, to see up close what companies are developing in terms of increasingly distinctive technologies and solutions in the fields of electrification - from connectivity to autonomous driving and sustainable and shared mobility, from Big Data to software-designed vehicles - thus projecting the entire Italian region towards new challenges and new consumer markets.*

*We therefore expect that this important Symposium, besides allowing us to meet live those who already know Marzocchi Pompe, will also be an opportunity to get in touch with potential new customers and make us even more proactive in a market that is constantly and frenetically evolving".*

**Marzocchi Pompe S.p.A.**

Marzocchi Pompe is a leading company in the design, production and marketing of high performance gear pumps and motors, which are used in various fields: industrial, mobile and automotive. It closed 2020 with approximately 34 million euros in sales revenue. Founded in 1949, it is controlled by the Marzocchi family, which holds the majority of shares and is present in the company with Paolo Marzocchi, Chairman, and his son Carlo, Vice Chairman. The shareholding structure also includes CEO Gabriele Bonfiglioli and four other managers. Production is carried out entirely in Italy at the two sites of Casalecchio di Reno (BO) and Zola Predosa (BO). Marzocchi Pompe is present in over 50 countries through an international distribution network.
