

PRESS RELEASE

**MARZOCCHI POMPE AT THE IVT EXPO EXHIBITION IN COLOGNE**

Zola Predosa, 28 June 2022 – Marzocchi Pompe S.p.A. (EGM:MARP), a leading company in the design, production and marketing of high-performance gear pumps and motors, announces that it **will take part in the "iVT Expo" exhibition**, one of the most important international events in the field of components and latest and next-generation technologies for off-highway vehicles, construction equipment, agricultural machinery and hybridisation of vehicles and machinery, which will be held **from tomorrow until Thursday, June 30th, at the Köln Messe in Cologne, Germany**.

At Marzocchi Pompe's stand, no. 1100, visitors and conference delegates will be able to admire the range of traditional gear pumps in aluminium and cast iron, particularly suited to the stressful conditions of heavy machinery, as well as helical gear pumps, ideal for applications in electric and hybrid vehicles in a variety of sectors, from agriculture to construction, from industrial to renewable energy.

A special focus on the Elika family, already the protagonist of a dedicated conference at last year's digital exhibition, with highly innovative features that can increase efficiency and reduce costs when applied in electrified powertrain systems.

Gabriele Bonfiglioli, CEO of Marzocchi Pompe, commented: *"We are happy to be present for the first time in Europe this year, showcasing all the features for which our aluminium and cast iron pumps stand out in the gear pump market. Our satisfaction is even greater because we are taking part in one of the most important trade fairs in our sector, where we also have the opportunity to illustrate the unique applications of the ELIKA pump in the field of industrial and mobile vehicle electrification. The latter is a sector that is experiencing a moment of great excitement from the point of view of the development of new solutions, for which the ELIKA family can be particularly attractive, responding to the growing technological needs of the market."*

**Marzocchi Pompe S.p.A.**

Marzocchi Pompe is a leading company in the design, production and marketing of high-performance gear pumps and motors, which find application in various fields: industrial, mobile and automotive. It closed 2021 with more than €40 million in sales revenue. Founded in 1949, it is controlled by the Marzocchi family, which holds the majority of shares and is represented in the company by Paolo Marzocchi, President, and his son Carlo, Vice-President. The shareholding structure also includes CEO Gabriele Bonfiglioli and four other managers. Production is carried out entirely in Italy at the two sites in Casalecchio di Reno (BO) and Zola Predosa (BO). Marzocchi Pompe is present in over 50 countries through an international distribution network.
